

INDIVILLAGE

We provide high-quality, human-powered, secure training data to leading organizations all over the world. Our highly-skilled teams work across all types of data annotation and e-commerce requirements to streamline your business. Our “profit-for-all” impact sourcing model creates sustainable change with initiatives for livelihood, education and gender equality in non-urban areas to transform them into regions to work, live and grow in.

OUR SERVICES

Data Services: We help boost your customer service by taking large amounts of unstructured data and making it manageable.

E-commerce: Our experienced team will help boost your digital presence, manage your e-catalogues and grow your online business.

Computer Vision: We provide text, image, and video annotation services to enhance your machine learning capabilities.

Natural Language Processing: We help extract meaning from natural language data to train your algorithms to decipher sentiments from content.
